

**Session Title:** Converging on Spatial Data Science

**Session Description:** This panel will explore some of the challenges and opportunities as spatial analysis and data science converge. Topics will include teaching spatial data science beyond the traditional classroom, the impact of imposter syndrome, and what the future might look like.

**Session type:** Panel discussion

**Duration:** 60 minutes

**Speakers:**

1. Marcela Suárez, Penn State University
2. Lauren Bennett, Esri
3. Canserina Kurnia, Esri (Moderator)
4. TBD
5. TBD

**Expected participation (i.e, who would be interested in attending your session)?**

Educators and general audience interested on the topic of spatial data science.
